0034 1 ABSTRACT:
0035 1
0036 1 This routine is called by the compiled code to remap an array.
0037 1 The array will be an array of descriptors, since all dynamic
0038 1 variables are stored as descriptors.
0039 1
0040 1 ENVIRONMENT: Runs at any access mode - AST reentrant
